EXAMINER'S AMENDMENT

This application is in condition for allowance except for the presence of claims 12-22 drawn to a species non-elected without traverse.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 12-22 have been cancelled.

REASONS FOR ALLOWANCE

The terminal disclaimer filed on April 12, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,637,572 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claims 1-11 and 23 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the prior art of record shows or suggests an electromagnetic clutch structure including first and second electromagnetic clutches wherein the first clutch transmits torque from a right output shaft connected to a right driven wheel to a left output shaft connected to a left driven wheel, the second clutch transmits torque from

the left output shaft connected to the left driven wheel to the right output shaft connected to the right driven wheel, wherein selective operation of the clutches transmits torque from the output shaft on the inside of a turn to an output shaft on the outside of the turn, and further wherein the first clutch includes a first armature placed on a right side of a core housing and the second electromagnetic clutch includes a second armature placed on a left side of the coil housing as set forth in claim 1.

Nor does the prior art of record show or suggest an electromagnetic clutch structure including first and second electromagnetic clutches with respective first and second coils wherein the first clutch transmits torque from a right output shaft connected to a right driven wheel to a left output shaft connected to a left driven wheel, the second clutch transmits torque from the left output shaft connected to the left driven wheel to the right output shaft connected to the right driven wheel, wherein selective operation of the clutches transmits torque from the output shaft on the inside of a turn to an output shaft on the outside of the turn, and further wherein the clutch operated when turning right includes an armature placed on the right side of the respective coil and the clutch operated when turning left includes an armature place on the left side of the respective coil as set forth in claim 23.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard M. Lorence whose telephone number is (703) 308-3062. The examiner can normally be reached on Mondays through Fridays from 9:00AM to 5:30PM.
